

To
whom it may concern,

December, 2025

I had the pleasure of working with Antonio Supan on the ehzzo project at Atos, and I can confidently say he is one of the most dedicated and technically gifted software engineers I've collaborated with. Antonio consistently demonstrated deep expertise in software development, a strong problem-solving mindset, and the ability to turn complex challenges into robust, scalable solutions.

His commitment to quality, paired with a collaborative and positive attitude, made a significant impact on our team's success. Antonio didn't just write code — he elevated our technical discussions, offered thoughtful insights, and helped shape the architectural decisions that strengthened our product.

Above all, Antonio stands out for his professionalism, curiosity, and willingness to go the extra mile. I wholeheartedly recommend him to any team looking for a highly skilled, driven, and supportive engineer.

A handwritten signature in black ink that reads "Vedran Borozan". The script is fluid and cursive.
