Letter of Recommendation

I've had the pleasure of working closely with Antonio Supan at FINA, collaborating on several .NET-centric initiatives spanning fintech solutions and large-scale document management systems. From day one, Antonio impressed with a blend of deep technical expertise, thoughtful architecture, and unshakable focus on delivering high-quality software that meets real business needs.

Antonio approaches complex domains like financial workflows and document automation with clarity and precision. His .NET skills are top-tier, and he consistently applies best practices to build maintainable, secure, and efficient systems. Beyond pure development, what truly sets Antonio apart is his ability to communicate technical concepts clearly across cross-functional teams, bridging the gap between engineering, product, and stakeholders to keep projects aligned and progressing.

Working with Antonio elevated the team's overall performance. He brings not just technical leadership but also a collaborative mindset and a calm problem-solving approach that turns uncertainty into structured, actionable progress.

Any team or project would benefit greatly from his skill, integrity, and dedication.

Best regards,

Antonio Sertic
