CORE STACK

C# / .NET / REST APIs
SQL / MSSQL / PostgreSQL
Azure / Azure DevOps
CI/CD / Docker / IIS
Architecture / provisioning
Dynamics 365 / Power Platform
TypeScript / Vue / React
Loki / Grafana / OTLP
Logstash / Kibana

AI AUTOMATION

Azure AI Foundry / LLM APIs
Embeddings / vector search
RAG / knowledge bases / pgvector
Agent workflows / chatbots
OCR / screening agents
CRM/ERP process automation

STRENGTHS

Initiative & ownership
Complex domain solving
Architecture to production

LANGUAGES

Croatian - native
English - professional
German - basic

EDUCATION

Software Engineering
- Virovitica University of Applied
Sciences, Croatia

ANTONIO SUPAN

SOFTWARE ENGINEER | .NET | ARCHITECTURE |
AI AUTOMATION

ABOUT

Software engineer with 7 years of experience designing and delivering enterprise, public-sector and financial systems from architecture to production. Combines .NET, APIs, Azure, data, AI and observability with strong ownership of complex domain problems, stakeholder alignment and reliable delivery.

EXPERIENCE

Oct 2025
Present

COMBIS d.o.o. | Software Engineer / AI & Automation Lead

Designed and delivered greenfield systems from domain discovery and architecture through .NET/API implementation, CI/CD, observability and production rollout for CARNET, Croatian Customs, Croatian Telecom, APIS IT, GSKG, Coca-Cola HBC, Atlantic Group and others. Proactively took ownership of ambiguous, domain-heavy problems, coordinated stakeholders and transformed manual CRM/ERP workflows into reusable AI and automation solutions.

Jun 2024
Sep 2025

Axians Hrvatska d.o.o. | Senior Software Engineer

On the Ministry visa platform, independently drove complex domain and integration issues across full-stack .NET, Azure provisioning, infrastructure automation and production incidents. Improved reliability and traceability with CI/CD, Logstash/Kibana, outbox processing and idempotent flows while translating stakeholder needs into deployable solutions.

May 2023
May 2024

Eviden d.o.o. / Atos ecosystem | Software Engineer

On the approx. EUR 17M eHZZO national healthcare platform, translated intricate healthcare rules and data constraints into C#/SQL components, documentation and operational handover, proactively resolving cross-team issues to protect maintainability, accuracy and long-term support.

Oct 2021
Apr 2023

Financial Agency - FINA | Developer / IT Specialist

On InfoBiz and eFondovi, identified and streamlined difficult business and reporting workflows beyond assigned tasks, delivering backend/SQL features and integrations that reduced manual handling and strengthened data reliability.

Nov 2019
Oct 2021

Financial Agency - FINA | Student Software Engineer

Took initiative in poorly documented enterprise modules, quickly learning .NET, T-SQL and integration patterns while supporting full-stack delivery, maintenance and structured releases.

SELECTED TECHNICAL AREAS

- Architecture & delivery: Greenfield .NET systems, APIs, Vue/React, domain modelling and production rollout.
- AI & knowledge: LLM integrations, embeddings, vector search, RAG, knowledge bases and Azure AI Foundry.
- Platform & observability: Azure, CI/CD, Docker, IIS, Loki, Grafana, OTLP, Logstash and Kibana.
- Reliability & data: MSSQL/PostgreSQL, outbox, idempotency, production troubleshooting and automation.

PROJECT HIGHLIGHTS

- FER Learning Analytics: end-to-end .NET 10, Vue and PostgreSQL platform delivering study results and actionable insights to students and professors, with AI/RAG foundations.
- Enterprise/public systems: greenfield COMBIS solutions, the Ministry visa platform and the eHZZO national healthcare platform (approx. EUR 17M).
- Impact: CRM/ERP automation, OCR/screening agents, reusable delivery patterns and production-grade observability that reduce manual work and support cost.
